- Built and managed channel partner relationships.
- Provided training on products and digital processes.
- Ensured high customer satisfaction and retention.

Projects

WMS/TMS Logistics Management System – UK Client

Tech Stack: PHP, PDO, MariaDB/MySQL, JavaScript, jQuery, Linux

- Maintained and enhanced a live logistics system supporting warehouse and transport workflows.
- Debugged legacy PHP code and database operations in a production environment.
- Implemented system enhancements including tracking, email processing, PDF generation, and automated alerts.
- Worked with Linux server environments and collaborated directly with the UK-based client.

Kitchen Pulse – B2B Food Supply Platform

Tech Stack: React, Node.js, Express.js, MongoDB

- Applied secure authentication and role-based access system for 4+ user roles.
- Built inventory and supplier management modules handling 5,000+ records.
- Executed OCR-based invoice processing workflow with 90% accuracy.
- Created analytics dashboards using MongoDB aggregation, improving reporting speed by 35%.
- Incorporated PDF generation for reports and invoices, supporting 1,000+ downloads.

AI Counsellor for Study Abroad

Tech Stack: React, Node.js, Express.js, OpenAI API, MongoDB

- Built AI-powered guidance system serving 300+ active users.
- Developed and deployed personalized recommendation features.
- Enforced secure authentication and session handling.
- Processed 500+ student queries through real-time chat interface.

Food Delivery Web Application

Tech Stack: MERN Stack

- Constructed end-to-end food ordering workflow with authentication.
- Integrated cart, order tracking, and admin management modules.
- Improved checkout performance by optimizing backend services.

E-Commerce Web Application

Tech Stack: MERN Stack

- Implemented shopping cart, checkout, and order management system.
- Built admin panel for product, user, and inventory management.

Education

B.E. – Information Technology
Dr. Babasaheb Ambedkar College, Nagpur (2016)
CGPA: 8.2
